

Civil Engineering Technologist/Technician  
S. LLEWELLYN & ASSOCIATES LIMITED

Company Description:

Specializing in municipal and land development engineering, S. Llewellyn & Associates is a full service civil consulting engineering firm servicing both the public and private sectors since 2000. Our services cover the full spectrum of development engineering from preliminary planning, to detailed design and approval, to contract administration and construction inspection.

Responsibilities:

The candidate will be responsible for construction inspection/CAD drafting under the supervision of a senior technologist. Projects the candidate will be working on could include municipal servicing and road design for subdivisions, condominium sites and commercial projects. Other projects include municipal infrastructure reconstruction of such things as roads, watermains and/or sewers.

The candidate will become familiar with municipal engineering standards and specifications and their application in the field. They also will be responsible for keeping accurate notes and records of events concerning the construction of the project. Coordination with other people such as contractors and municipal inspectors on the job site is also critical.

The candidate will be required to do miscellaneous office jobs such as blue printing, plotting, filing and record keeping.

Qualifications:

The candidate will be a graduate of the Civil Engineering Technology program.

Will have basic computer knowledge in such programs as Windows XP, Windows 7 or higher

Will have at least entry level Autocad skills with Autocad 2000 or higher.

Will have good communication skills and be able to work in a team environment with other design professionals.

Will have some basic drafting skills (manual or computer) and will be required to bring samples of previous work if asked to an interview.

Valid Class "G" licence required.

Some survey experience would be an asset.

Rate of Pay: \$18.00/hr.
